Project Description: The UIUC Biodiesel Initiative is a project of the student group Engineers Without Borders that seeks to collect Waste Vegetable Oil (WVO) from all university dining halls and convert it to biodiesel fuel that can be used by campus vehicles maintained by the UIUC Campus Garage and Carpool (operated under Facilities and Services). Funds from Facilities & Services are being used to modify the Campus garage to meet safety regulations. The additional funds from our Committee for the initiative are needed to complete the reactor and other fixed costs. A current fixed costs budget for the initiative is attached.

Student Clean Energy Committee:

Stephanie Bogle, 07-08 Committee Chair
Treasurer

Shreyas Sundaram, 07-08 Committee
