Student Sustainability Committee;

Allerton Solar Array Phase II is an amazing opportunity in so many ways. As students on the U of I campus we have a continued interest both in Allerton and in sustainable measures. Allerton will benefit not only from decreased dependency on traditional and outdated energy models, but also the added interest and innovation that a solar array brings to the park. Allerton's Solar Arrays can be promoted as pioneering in the sustainability field at the U of I campus, and Allerton is always receptive to hosting multitudes of learning opportunities about its endeavors. Adding Phase II to Allerton's Solar Array installation will only build interest, learning, pride, and sustainability for Allerton and for the U of I, and, as current students and future alumni, we fully support this venture.

Sincerely, 
President of the Allerton Ambassadors RSO
