Subject: Orchard Downs Multifunctional Landscape Proposal

Professor Lovell:

This is to indicate support on behalf of University Housing for the Orchard Downs Multifunctional Landscape Proposal which you and your students are submitting to the Student Sustainability Committee for funding support. Should funding for this proposal be approved, there are additional levels of support and approval that this proposal will need in order to become reality. I will work with Facilities & Services to determine how this project should be executed; whether through in-house labor, potential for student labor, or contractor services. I believe for this project to move forward following funding support from the SSC, that we should consider taking it to the CCRC (Chancellor's Capital Review Committee) for approval. I indicate as such because the area proposed for this project, while "maintained" by University Housing, represents an entrance point to the University. Furthermore, while not in our long term plans for any development, the University may have plans in the future regarding this area of land. Thus the support indicated as noted above should be considered an initial step in bringing this proposal to reality.

If you have questions, please let me know.

Regards

John Humlicek
